FARM & RANCH Equipment

THE TARTER DIFFERENCE

- 1 Tarter uses innovative vertical "Z" bracing for added rigidity, vertical strength, and safety.
- 2 Tarter has ready-to-use, pre-installed hinge/drop pins with heavy links. This allows the customer to get the complete view of the product before purchase without extra installation by dealer or the customer.
- 3 Continuous braces welded on top, bottom, and on every bar providing extra strength to the product. No skip welding.
- 4 Tarter gates and corrals are manufactured of high tensile 1-3/4" diameter tubing and filler bars for durability and safety. The standard size for most companies is 1-5/8". (Gates and corral panels also available in 2" diameter)
- 5 Tarter uses premium, durable, automotive quality, corrosion-resistant powder coat finish on all products.
- 6 With Tarter, most products are in stock with a minimum delivery time.

6-BAR ECONOMY TUBE GATE

- Perfect gate between pastures and entries
- 1-3/4" round high-tensile strength tubing
- Superior continuous-welded saddle joints
- Stands 50" high with Vertical "Z" braces
- Ready to hang with weld on chain latch
- Available sizes from 4' - 20'
- 6-bar is available in green, red, and brown
- Also available in galvanized in 4'-16' lengths
- Features our durable, corrosion-resistant powder coat finish

4GVWT12

CORRAL PEN CALCULATOR

- 1) To find the number of panels needed, multiply the desired diameter (straight line passing through the center of the circle) by 3.14. This will determine the circumference (the distance around the circle).
- 2) Divide the circumference by the length of panels being used. This will equal the number of panels needed.

Diameter of Holding Area (Feet)

Panel Length	20'	25'	30'	35'	40'	45'	50'	55'	60'	65'	70'	75'	80'	85'	90'	95'	100'
10'	6	8	9	11	13	14	16	17	19	20	22	24	25	27	28	30	31
12'	5	7	8	9	10	12	13	14	15	16	18	20	21	22	24	25	26
16'	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20

NOTES: Sizes of pens are approximate. Pen sizes will vary depending on the size of the Walk-Thru Arch Gate used. Walk-Thru Arch Gates are available in 4' and 6' lengths. Walk-Thru Arch Gates with Panels are available in 10' and 12' lengths for a more rigid entry.

The Valu-Line Series features 5-bar lightweight price performers that are perfect for light-duty needs. They feature straight end-post construction and feature our durable, corrosion-resistant powder coat finish, and continuous-welded saddle joints constructed with 1-1/2" tubing. They are easy to handle, maneuver, and afford.

VALU-LINE 5-BAR 6' WALK-THRU WITH 6' PANEL

- Provides ease of access for both livestock and herdsmen into round pens
- 6' wide walk-thru and features double-brace bow design
- 6' wide panel attachment
- Chain and latch connects to the corral with our drop-pin hookup system
- Custom loop legs prevent sinking
- Available in gray only

VALU-LINE 5-BAR 12' CORRAL PANEL

- Ideal for light confinement and are portable for travel to overnight shows or trail rides
- Stands 62" high with vertical "Z" braces
- Unique drop-pin hookup for quick and easy setup
- Custom loop legs prevent sinking
- Available in gray only

VALU-LINE 5-BAR 6' WALK-THRU

- Provides ease of access for both livestock and herdsmen into round pens
- 6' wide and features double-brace bow design
- Chain and latch connects to the corral with our drop-pin hookup system

HEAVY-DUTY CUBE FEEDER

- Ideal for portable feeding from trucks, wagons, and other portable means
- Available in 1,200 lb. capacity
- Works well with small pellets and ground feed
- Auger spout door is adjustable to control the amount of flow
- Auger is covered by flow plate to keep feed moving safely and smoothly
- 4" high-speed motor driven auger distributes 200-250 lbs. of feed per minute providing quick and easy feeding
- Heavy-duty motor features a belt drive and all the electrical hookups necessary to allow easy operation from your truck cab
- Feeder spout features a rope pull adjustment so you can change feeding height on the fly
- Designed to mount to flatbed or wagon
- Features our durable, corrosion-resistant powder coat finish

HDCF12

Description	Item #	Height	Approx. Weight	Overall Length	Width
1,200 lb. Heavy-Duty Cube Feeder*	HDCF12	37"	325 lbs.	65"	31"

*Special order requiring additional lead-time.

Adjustable flow auger spout.

Easy fold back lid with extra-wide fill space.

Adjustable auger flow plate.

1-1/2 HP motor.

Motor driven auger with belt drive and removable guard.

CATTLE HANDLING Equipment

CATTLEMASTER HEAVY-DUTY SQUEEZE CHUTE

- Features a high-mount, single-lever, double-sided squeeze mechanism with heavy-duty linkage to keep animals firmly in place
- Available with either manual or automatic headgate
- Drop-down horseshoes for easy top-side access, as well as the fold-down and fully-removable bottom panels
- Spring-loaded side exit door for larger animals to exit and for sorting
- Scale-ready and equipped to handle various load bar configurations
- Rear vertical sliding tailgate with automatic locking that locks it in both the closed and fully open positions with safety stop at top
- Rear tailgate release and side door release feature durable triangular pull handles hooked to pulleys at pivot points for ease of operation and durability
- Modular design allows for addition of optional accessories such as palpation cage, tailgates, and alleyways
- Constructed of 2-3/8" tubular steel with grease fittings at critical points
- Bottom side adjustments with multiple settings for various size animals
- Chute is recommended for cattle up to 1,500 lbs.
- Features our durable, corrosion-resistant powder coat red finish

Cattlemaster Squeeze Chute with Automatic Headgate – CMSCA

WK

HEAVY-DUTY

CATTLEMASTER AUTOMATIC HEADGATE

- Perfect for medium-to-large herds
- Operated smoothly by single operator
- Adjusts from calves to bulls
- Grease fittings at critical points
- Positive latching with in/out rotating door
- Reversible controls allow it to be operated from either side
- Adjustable bottom to accommodate various animal sizes
- Constructed of quality heavy-duty 2-3/8" tubular steel
- Overhead bar prevents accidental release of automatic headgate
- Headgate is recommended for cattle up to 1,500 lbs.
- Sold separately or with Cattlemaster Chute
- Available in powder coat red only for superior corrosion protection

CMAH

CATTLEMASTER MANUAL HEADGATE

- Perfect for medium-to-large herds
- Superior "catch-ability" of a manual chute
- Heaviest and most proven for any size animal
- Constructed of quality heavy-duty 2-3/8" tubular steel
- Headgate is recommended for cattle up to 1,500 lbs.
- Sold separately or with Cattlemaster Chute
- Available in powder coat red only for superior corrosion protection

CMMH

MEDIUM-DUTY

CATTLEMAN AUTOMATIC HEADGATE

- Ideal for small herds
- Single-person operated
- Works with Cattleman Chute
- Can be bolted to wooden alley posts if desired
- Grease fittings at critical points
- Single-piece top linkage for smooth operation
- Quality constructed of heavy-duty 2-3/8" tubular steel
- Headgate is recommended for cattle up to 1,100 lbs.
- Sold separately or with Cattleman Chute
- Available in powder coat red only for superior corrosion protection

CAH

CATTLEMAN MANUAL HEADGATE

- Ideal for small herds
- Superior "catch-ability" of a manual chute
- Works with Cattleman Chute
- Can be bolted to wooden alley posts if desired
- Works with animals of all sizes
- Headgate is recommended for cattle up to 1,100 lbs.
- Sold separately or with Cattleman Chute
- Available in powder coat red only for superior corrosion protection

A SUPERIOR SYSTEM!

SIX REASONS WHY TARTER'S CATTLE-HANDLING EQUIPMENT IS ALL YOU NEED TO GET THE JOB DONE.

ONE Every unit is pre-assembled at the factory prior to shipping. Everything fits the way it is supposed to. Nothing is missing. Nothing is broken. That's why we can guarantee smooth assembly and operation each and every time.

TWO No tools required for assembly, unless sweep gate latch is reversed. Assembly is simple. The complete unit can be set up in 6 different configurations, putting the controls where you want them, in less than an hour.

THREE Each tub has 3 full bows to hold the sweep tub in place – this means no shifting or moving of any tub panels regardless of the load.

FOUR A fully adjustable alleyway on all units allows working animals of any size. These are versatile systems, designed for a wide range of species, sizes, and ages. The alleyway rolls on a smooth but tough roller system. Large alley adjustment handles make adjustment easy in 3" increments from 13" to 31". Interchangeable first bow at chute connection points make for clean and easy connections to either the Cattlemaster or Cattleman Chutes.

FIVE Value pricing offers a heavy-duty system at a lightweight price. All sweep and alley systems are 14-gauge or heavier. The 7-bar design on both the open and sheeted unit is heavier and more rigid than any on the market. You simply get more cattle-handling capacity, versatility, and simplicity for a good deal less money. The durable, corrosion-resistant powder coat finish will still be bright and rust-free long after dip-painted models are covered in rust. Expect these heavy-duty, rugged units to be your working partners for a long, long time.

SIX Both open and sheeted units ship complete on a single pallet that includes all components and easy-to-use, picture-based assembly instructions. This means easy shipping to the store and easy transport to the farm after purchase.

Both the open and sheeted systems are fully reversible and can be configured in 6 different setups. Straight lead-in setups include a 10' alley. For a 20' alley on a straight lead-in configuration, one additional alley panel (SAP10 or SSAP10) and one additional bow (AAA2) must be purchased.

Area required for setups
1, 2, 5, and 6: 21' x 31' 6"

Area required for setups
3 and 4: 11' 3" x 31' 10"

STANDARD BUCKET SPEAR

- Front bucket mounted unit designed for round bale lifting and moving
- Easily mounts and dismounts with a single bolt without removing the bucket (bolt and nut included)
- Spear lifts up to 1,500 lb. bales
- Heavy-duty replaceable heat-treated upper spear and two lower welded stabilizer bars for extra hold and stability
- Features our durable, corrosion-resistant powder coat finish

NOTE: Spear must be securely mounted to bucket with provided nut and bolt for extra strength

NOTE: Bale must be fully seated against frame of spear before attempting to move bales

BUCKET-MOUNT SUPER SPEAR

- Front bucket mounted unit designed for round bale lifting and moving
- Easily mounts and dismounts with a single bolt without removing the bucket (bolt and nut included)
- Spear lifts 2,000 lb. bales
- Heavy-duty replaceable heat-treated upper spear and two lower welded stabilizer bars for extra hold and stability
- Features our durable, corrosion-resistant powder coat finish

NOTE: Spear must be securely mounted to bucket with provided nut and bolt for extra strength

NOTE: Bale must be fully seated against frame of spear before attempting to move bales

FRONT ADJUSTABLE SUPER SPEAR

- Front mount round bale spear for moving and lifting round bales
- Sliding mount brackets with multiple hole adjustments to fit most any front end loader
- Designed for easy mounting and lifting of heavier round bales
- Spear lifts up to 2,200 lb. bales
- Heavy-duty replaceable heat-treated upper spear and two lower welded stabilizer bars for extra hold and stability

NOTE: Bale must be fully seated against frame of spear before attempting to move bales

Description	Item #	Height	Approx. Empty Spear Weight	Width	Overall Length	Center Spear Length	Stabilizer Spike Length	Max. Bale Capacity
Standard Hay Spear	HFGR	26-1/4"	95 lbs.	36"	51"	45"	14-1/2"	1,500 lbs.
Heavy-Duty Super Spear	SSGR	26-1/4"	75 lbs.	36"	51-1/2"	45"	14-1/2"	2,000 lbs.
Standard Bucket Spear	SBSGR	16"	100 lbs.	28-3/4"	62-3/4"	45"	15"	1,500 lbs.
Bucket-Mount Super Spear	BSGR	8-3/4"	65 lbs.	30-1/4"	61-1/2"	45"	15"	2,000 lbs.
Front Adjustable Super Spear	FSSGR	20-1/4"	200 lbs.	61"	52-1/2"	44"	13"	2,200 lbs.

QUICK ATTACH SUPER SPEAR

- Universal front mount round bale spear
- Mounts in place of the bucket on a front end loader using the universal mounting system (not for use on skid steer units)
- Designed for easy mounting and lifting of heavier round bales
- Spear lifts up to 2,200 lb. bales
- Heavy-duty replaceable heat-treated upper spear and two lower welded stabilizer bars for extra hold and stability
- Features our durable, corrosion-resistant powder coat finish

NEW PRODUCT!

NOTE: Bale must be fully seated against frame of spear before attempting to move bales

HEAVY-DUTY HAY LIFTER

- Designed for the heaviest of round bale lifting that normal spears can't touch
- 3-point rear attach round bale hay mover
- Great for lifting loose or older bales
- Lifts up to 2,200 lb. bales
- 2-stage Category I and Category II with pin hookups to fit both medium and larger tractors (2-stage Cat. I & Cat. II pin included)

Description	Item #	Height	Approx. Empty Spear Weight	Width	Overall Length	Max. Bale Capacity
Heavy-Duty Hay Lifter	HLGR	32"	180 lbs.	44"	60-1/4"	2,200 lbs.

Description	Item #	Height	Approx. Empty Spear Weight	Width	Overall Length	Center Spear Length	Stabilizer Spike Length	Max. Bale Capacity
Quick Attach Super Spear	QASSGR	22"	192 lbs.	48"	47-1/2"	44"	13"	2,200 lbs.

BOOM POLE

- Ideal for loading items on to trailers, pulling up old fence posts, or other lifting chores
- 3-point rear attach lifting pole with Category I hookup (Cat. I pins included)
- Features 2 different lifting loops for extra capacity and heights
- Front loop lift capacity up to 500 lbs.
- Rear loop lift capacity up to 1,000 lbs.
- Features our durable, corrosion-resistant powder coat finish

Description	Item #	Height	Empty Weight	Width	Length	Lift Capacity Front Loop	Lift Capacity Back Loop
Boom Pole	BPGR	25-1/2"	66 lbs.	32"	85-1/2"	500 lbs.	1,000 lbs.

REAR GRADER BLADES

- Ideal for grading or scraping needs, such as sand, snow, or gravel
- Pull-pin design with 5 reversible blade angle adjustments
- 1/4" blade with 1/2" thick replaceable cutting edge
- Standard units work efficiently up to 25-45 HP on 540 RPM tractors (depending on blade size)
- Heavy-duty units work efficiently up to 45 HP on 540 RPM tractors
- Heavy-duty unit can be offset up to 12" either direction with a 7° tilt (blade oscillation in either direction)
- Heavy-duty unit comes standard with replaceable support stand allowing for easier hookup
- Category I quick-hitch hookup (Cat. I pins included)
- Features our durable, corrosion-resistant powder coat finish

Description	Item #	Unit Height	Blade Height	Approx. Weight	Width	Length	Replacement Blade Item #
5' Rear Grader Blade	GBGR5	38"	15"	197 lbs.	60"	40"	RB5
6' Rear Grader Blade	GBGR6	38"	15"	213 lbs.	72"	40"	RB6
7' Rear Grader Blade	GBGR7	38"	15"	232 lbs.	84"	40"	RB7
7' Heavy-Duty Rear Grader Blade*	GBHDGR7	39"	15"	360 lbs.	84"	39"	RB7
8' Heavy-Duty Rear Grader Blade*	GBHDGR8	39"	15"	387 lbs.	96"	39"	RB8

*Special order requiring additional lead-time.

3-POINT EQUIPMENT

TARTER FERTILIZER SPREADERS AND SEEDERS

- Three models available - One all-steel tub and two all-poly tubs
- Seamless, 1-piece, 850-lb. and 500-lb. capacity hoppers
- Reversible lift arm pins to accommodate different size tractors (FS & FSP)
- PTO-driven spin broadcast with super treated spreading disc and galvanized fins
- Side discharge hopper guarantees greater accuracy and more even spreading
- Spreading width up to 46'
- Can broadcast to each side for directional spreading when needed
- Fully splined gearbox shaft
- Fully galvanized opening system kit
- Super-duty epoxy painting throughout the complete frame
- Category I quick-hitch compatible (Cat. I pins included)

FS

FSP

Spreading volume coverage and rate will vary with the material being spread, spreader aperture settings, machine speed, and terrain. Consult the spreader rate chart for precise indications. Unit performs optimally at ground speed of 6-8 MPH and PTO speed of 540 RPM.

NEW PRODUCT!

PFS

Tub Agitator

Description	Item #	Color	Height	Approx. Weight	Tub Diameter	Spreading Capacity	Spreading Width
Fertilizer Spreader – Metal Tub	FS	Red	42"	135 lbs.	40"	850 lbs.	46'

Fertilizer Spreader – Poly Tub Model 50	PFS	Red	36"	75 lbs.	37"	500 lbs.	46'

LANDSCAPE RAKES WITH OPTIONAL WHEEL KITS

- Rake used for smoothing, raking, or contouring soil surfaces
- Rotates a full 360° with 5 forward and 5 reverse settings to be pulled or pushed
- Standard units work efficiently up to 25-35 HP on 540 RPM tractors (depending on rake size)
- Replaceable high carbon curved tines
- Use with or without wheel kit
- Wheels allow several points of adjustment for varying heights above grade
- Category I quick-hitch hookup (Cat. I pins included)
- Features our durable, corrosion-resistant powder coat finish

LRGR6 with optional Landscape Rake Wheel Kit

Description	Item #	Height	Approx. Weight	Width	Length
5' Landscape Rake	LRGR5	39"	195 lbs.	60"	42"
6' Landscape Rake	LRGR6	39"	215 lbs.	72"	42"
7' Landscape Rake	LRGR7	39"	238 lbs.	84"	42"
Landscape Rake Wheel Kit	LRWK	12"	62 lbs.	10"	25"

NOTES: This unit can be fitted with optional wheel kit.

Landscape Rake Wheel Kit – LRWK (fits all sizes)

POST HOLE DIGGER

- 3-point rear attach, PTO driven, post hole digger helps make the difficult job of digging post holes easier
- Reinforced boom tube and shear bolt protection gives you the confidence you need to complete any task
- 2" gearbox output shaft is geared by 540 RPM PTO
- Post Hole Digger Adapter available (accommodates 2-9/16" shaft)
- Category I hookup (Cat. I pins included)
- Available with 6", 9", and 12" augers (Augers not included)

Description	Item #	Overall Height	Approx. Weight	Width
Post Hole Digger	PHDGR	27"	165 lbs.	36"
6" Auger	A486	47"	26 lbs.	6"
9" Auger	A489	47"	39 lbs.	9"
12" Auger	A4812	47"	52 lbs.	12"
Post Hole Digger Adapter	PHDA	8"	10 lbs.	3"

QUICK-HITCH

- Allows for easy attachment to tractors
- Compatible for Category I hookup
- Adjustable top-link bracket for attaching to tractor
- Spring-loaded handles allows for quick and easy attachment and release of your Tarter 3-point equipment
- Easily increase productivity using the Tarter Quick-Hitch
- Turn lift arms into a hook system
- Engage and secure the implement from the tractor seat
- Features our durable, corrosion-resistant powder coat finish

Description	Item #	Overall Height	Approx. Weight	Width
Quick-Hitch	QHUGR	24"	73 lbs.	32"

TRAILER MOVER

- 3-point rear attach trailer mover that is handy for easy movement of gooseneck trailers, regular trailers, or farm wagons
- Move trailers without raising the landing gear
- 2" receiver accepts hitch for pin drop wagons or ball mount trailers
- 2-5/16" ball is included with purchase
- Category I quick-hitch hookup (Cat. I pins included)
- Features our durable, corrosion-resistant powder coat finish

TMGR

Description	Item #	Height	Approx. Weight	Width	Depth
Trailer Mover	TMGR	32"	47 lbs.	36"	12"

WIRE FENCE STRETCHER/UNROLLER

- 3-Point rear attach stretcher lets one person handle the wire and fencing work of a crew
- Stretcher holds spools of heavy wire fencing and unrolls as well as stretches
- Handles field fence rolls up to 65" tall
- Stretch field fence without kinking or tangling
- Fence can be stretched to desired tightness and held in place for nailing
- Category I quick-hitch hookup (Cat. I pins included)
- Features our durable, corrosion-resistant powder coat finish

WIRE & FENCING

POST DRIVERS

- Used to drive T-posts and smaller metal posts into ground
- Fashioned from 2" SCH 40 pipe
- Sturdy 1/2" thick rod handles to make post driving easier
- 14-18 lbs. depending on model
- Choose from solid or spring-loaded post drivers
- Spring-loaded drivers make a handy tool for big post driving tasks
- Features our durable, corrosion-resistant powder coat finish

Description	Item #	Approx. Weight	Length	Width
Post Driver	PD	14 lbs.	28-1/4"	7-3/4"
Standard Post Driver	SPD	18 lbs.	23-1/2"	9"
Spring-Loaded Post Driver	SLPD	17 lbs.	31"	7"

NEW PRODUCT!

FENCING CROSS ARCH

- Eliminates dangerous climbing or crawling over or under fences
- Features a 20-3/8" x 21" textured platform for maximum safety
- Slip resistant treads for stable, sure footing
- Easily folds for moving or storing
- Opened width is 57" and collapsed width is 7-1/2"
- Features our durable, corrosion-resistant powder coat finish

FCA

EARTH ANCHORS

- Provides an easy tie-down for a variety of uses
- Holds tarps in place, sturdy tent or canopy tie-downs, or holds temporary fence
- Screws into soil
- Available in red only

Description	Item #	Approx. Weight
9/16" x 3" x 15"	EA315	2 lbs.

TRADITIONAL BARBED WIRE

- Available in Class 1
- 2-point or 4-point barbs
- 5" barb spacing
- Each spool contains 1/4 mile of product
- Palletized and shrink-wrapped
- 27 spools per pallet (Barbed)
- 32 spools per pallet (Barbless)
- Sold in pallet quantities only

Barbed Wire - Class 1

Item #	Description	Barbs	Spacing	Gauge	ASTM
317831T	Barbed Wire Class 1	4PT	5"	12.5	A121
317821A	Barbed Wire Class 1	2PT	5"	12.5	A121
317801T	Barbless Cable Class 1	—	—	12.5	A641

SMOOTH WIRE

- Uniform diameter along the whole roll
- Heavy-duty galvanized finish resists rust
- Continuous rolls from start to end (without cuts)
- Class 3
- 100 rolls per pallet
- Sold by the roll

Galvanized Smooth Wire/Brace Wire

Item #	Description	Gauge	ASTM
317527A	10# Coils	9	A641

HIGH-TENSILE BARBED WIRE

- Available in Class 3
- Heavy-duty galvanized coating for years of longer life
- Weighs 50% less than traditional barbed wire without losing strength
- Allows for further placement distance between posts
- Extra-sharp barbs
- Easy carrying handle
- Cardboard cover protects from sharp barbs
- Palletized and shrink-wrapped
- 48 spools per pallet
- Sold in pallet quantities only

Barbed Wire - Class 3

Item #	Description	Barbs	Spacing	Gauge	ASTM
317871T	Barbed Wire High-Tensile Class 3	2PT	5"	15.5	A121

WELDED WIRE

- Heavy-duty galvanized wire
- 4" x 2" spacing
- High-tech welding process results in stronger welds and longer life
- Ideal for animal enclosures or plant protection
- Product comes in 100' rolls
- 9 rolls per pallet
- Sold in pallet quantities only

Item #	Gauge	Height	Length	ASTM
308312T	14.0	48"	100'	A641

3-POINT ATTACHMENTS TO HELP WITH ALL YOUR WIRE AND FENCING NEEDS!

TARTER MAKES VARIOUS 3-POINT ATTACHMENTS THAT CAN ASSIST WITH ALL OF YOUR WIRE AND FENCING NEEDS. SEE PAGE 33 FOR MORE INFORMATION ABOUT THESE PRODUCTS.

WIRE FENCE STRETCHER/UNROLLER

2" RECEIVER WIRE UNROLLER

POST HOLE DIGGER

STOCK 10 WIRE PANEL

- Sold in bundles of 50
- Stands 50" tall
- 16' length
- Constructed of 4-gauge wire
- 10 horizontal wires running the length of the panel
- Can be lined up with T-posts to form fencing panels
- Can be affixed to wooden posts with staples

Description	Item #	Height	Approx. Weight	Length
Stock 10 Wire Panel	CPS10	50"	36 lbs.	16'

COMBO THRIFTY WIRE PANEL

- Sold in bundles of 50
- Stands 50" tall
- 16' length
- Constructed of 4-gauge wire
- 13 horizontal wires running the length of the panel
- Can be lined up with T-posts to form fencing panels
- Can be affixed to wooden posts with staples

Description	Item #	Height	Approx. Weight	Length
Combo Thrifty Wire Panel	CPCT	50"	43 lbs.	16'

HOG WIRE PANEL

- Sold in bundles of 50
- Stands 34" tall
- 16' length
- Constructed of 4-gauge wire
- 11 horizontal wires running the length of the panel
- Can be lined up with T-posts to form fencing panels
- Can be affixed to wooden posts with staples

Description	Item #	Height	Approx. Weight	Length
Hog Wire Panel	CPH	34"	34 lbs.	16'

HORSE WIRE PANEL

- Sold in bundles of 25
- Stands 60" tall
- 16' length
- Constructed of 6-gauge wire
- 16 horizontal wires running the length of the panel with 2 x 4 spacing
- Can be lined up with T-posts to form fencing panels
- Can be affixed to wooden posts with staples

Description	Item #	Height	Approx. Weight	Length
Horse Wire Panel	WPG16	60"	75 lbs.	16'

4 X 4 UTILITY PANEL

- Sold in bundles of 25
- Stands 48" tall
- 16' length
- Constructed of 6-gauge wire
- 13 horizontal wires running the length of the panel
- Can be lined up with T-posts to form fencing panels
- Can be affixed to wooden posts with staples

TANKS & WATERERS

HEAVY-DUTY GALVANIZED CANNING & UTILITY TANKS

- Small sizes and heavy-duty handles make tanks easy to manage and store
- Lightweight tanks for a variety of uses
- Useful for small gardens, planters, feed storage, and assisting with chores around the home or farm
- Great drink coolers at social gatherings
- 4-ply, double-lock bottom
- Heavy-duty zinc G90 coating withstands harsh weather conditions
- 1-1/8" top rim is permanently rolled for strong reinforcement
- 1" tube inside rim of tank for additional strength
- Unmatched quality and consistency in construction

NEW PRODUCT!

HEAVY-DUTY GALVANIZED STOCK TANKS

Our Galvanized Stock Tanks are fabricated at Liberty Water Tanks, our state-of-the-art manufacturing facility dedicated to the exclusive production of water tanks. Our rigid standards and unparalleled manufacturing acumen combined with the finest high-quality steel and outstanding value make these the best galvanized tanks around. We take flat, rolled steel, coated with heavy-duty zinc G90, cut it into precise lengths, then guide it into shape on computer-driven forming mills that make the world's best galvanized water tanks at a faster rate and with fewer chances for human error ever. The formed tanks are matched to precision-cut bottoms, spot welded, and joined by a computer-driven-and-guided seaming station that makes 3 circumferences around each tank bottom before the sealer is applied. Then, 3 or 4 sets of tanks per day are filled with water for testing purposes so that no leakers ever make it out of the plant. They feature 20-gauge galvanized bottoms and 21-gauge sides as well as a four-ply double-lock seam at the bottom sealed with Pliogrip® Adhesive/Sealant Seam Sealer for a superior bond. All tanks are sold in bundles of 3.

- All tanks feature:
- 4-ply, double-lock bottom
 - Deep sidewall corrugation for strength
 - Heavy-duty zinc G90 coating withstands harsh weather conditions
 - 1-1/8" top rim is permanently rolled for strong reinforcement

- 1" tube inside rim of tank for additional strength
- Most feature a 1" drain plug
- Unmatched quality and consistency in construction

ELECTRIC WATERERS

- Constant fresh, clean water; like pouring your animals a fresh glass of water, on demand, 24 hours a day
- Internal heater keeps water from freezing in cold weather
- Constructed of 100% polyethylene material for years of trouble-free operation
- CSA certified
- FDA and HBP approved, food grade, recyclable plastic
- Rounded corners to handle abuse by livestock while ensuring livestock safety
- Corrosion-free products to provide many years of trouble-free operation
- Clean cool drinking water will lower respiration rates and body temperatures; increase feed intake and milk yield
- Time saver – automatic water refill
- Algae growth reduced on water
- Year-round ease of usage
- Product will not crack or rust in extreme weather conditions
- Bolt-down method keeps the waterer in desired location
- Less everyday maintenance
- Meets "Grade A" Dairy recommendations
- Model WEE10 is both wall and floor mount

Double Bowl Electric Waterer
9.2-gallon capacity – WEE100

Recommended head:
100 beef, 50 dairy, and 50 horses

Single Bowl Electric Waterer
4.8-gallon capacity – WEE50

Recommended head:
80 beef, 35 dairy, and 35 horses

Low Profile Double Bowl Electric Waterer
5.2-gallon capacity – WEE20

Recommended head:
60 beef, 25 dairy, and 30 horses

Wall or Floor Mount Electric Horse Waterer
2.9-gallon capacity – WEE10

Recommended head:
5 beef, 3 dairy, and 10 horses

Description	Item #	Height	Approx. Weight	Width	Length	Capacity	Heating Element

W44

Recommended head: 200 beef, 90 dairy, and 90 horses - Minimum 15 head

WATER TANK FLOAT VALVE

- Eliminates the need for manual water fills or expensive automatic livestock watering systems
- Attach to existing water tanks to allow automatic water fill when levels are low
- Operates with gravity flow or pressures up to 70 PSI
- Versatile for most any water tank
- Made of tough, high-density polyethylene
- Features replaceable water polyethylene shut-off orifice
- Attaches to standard garden hose
- 300 GPH capacity

WTFV

MULTI-USE UTILITY DE-ICERS

- Constructed of Cast Aluminum for ultimate efficiency and performance
- Thermostatically controlled to operate only when necessary
- Designed for multiple uses around home and farm
- Safe in plastic tanks
- Used in 25 and 50 gallon, buckets of all sizes, small animal drinkers, hog waterers, surface heater, and bird baths depending on unit model
- Available in 250 watt and 500 watt units with 6' cord

NEW PRODUCT!

UDI500/UDI250

DPD

DRAIN PLUG DE-ICER

- Unit prevents water from freezing from the bottom of the tank up and comes with built-in thermostat
- Fits most standard water tank drains with adjustments that can be made to seal around the de-icer for proper fit
- Stays submerged in water to prevent destruction by livestock
- 120 volt/1500 watt unit comes with 6' cord

FTD

FLOATING DE-ICER

- Unit prevents water from freezing in tank
- Encased in a rugged plastic housing for durability and for long life floating on top of the water
- Built-in thermostat and automatic shut-off in the event the unit is removed from the tank
- 120 volt/1500 watt unit that comes with 6' cord

STD

SINKING TANK DE-ICER

- Unit maintains a temperature above freezing with a thermostat control
- Comes with built-in safety feature to automatically shut off if it is taken out of the water
- 120 volt/1000 watt unit comes with 6' cord

RODEO & ARENA Equipment

Whether you're a recreational roper or a competitor, you'll find Tarter equipment is the ideal choice for all your roping needs!

—DAVID KEY
Professional Team Roper

DK
9x National Finals Rodeo Qualifier
1 Million Dollar PRCA Earnings Cowboy
2011 George Strait Team Roping Classic Champion

MANUAL CHUTE

- Ideal for releasing steers for personal or competition ropings
- Lowest cost/highest quality/heaviest roping chute on the market today
- Coordinated front and rear door closing, which prevents any accidental animal loss
- Quietest operation of any chute
- Reliable operation for any roping setup
- Easy one-handed operation for both tailgate release and opening/closing. Chute can be operated from either side.
- Fully covered and protected sure-release mechanism with covered springs and latches
- Grease zerks on pivot points
- Slanted door design with lower front openings keeps steer's head up while increasing visibility
- All chutes are based from this model with additional features

MRC

ELECTRIC CHUTE WITH REMOTE HEADGATE

- Offers the same great features as the Manual Chute but offers a single button remote headgate
- Features a 12V solar power system allowing it to be put anywhere without the need of an air compressor or electric 110V
- Headgate can be operated via manual release lever, on-board push button, or from remote on horseback
- Features our durable, corrosion-resistant powder coat finish

ERC RH

ELECTRIC CHUTE WITH REMOTE HEADGATE, TAILGATE, & PUSHER BAR

- Offers the same great features as the Electric Chute with Remote Headgate but has a unique air-driven pusher bar not found on other chutes
- Pusher bar is air-operated and holds the steer in ready position for optimal release
- Operate from a push-button wireless remote or using the on-board buttons
- Once the chute is released, the pusher bar automatically returns to its original state, out of the way for the next steer
- This unit allows user to operate with release lever, on-board push button, or from horseback with the 4-button remote
- Features our durable, corrosion-resistant powder coat finish

ERC RHTP

ELECTRIC CHUTE WITH REMOTE HEADGATE & TAILGATE

- Offers the same great features as the Remote Headgate Chute but offers an additional button to control the air-driven rear tailgate in addition to headgate
- On-board battery continually charged by the top mounted solar panel
- Headgate and tailgate, which have coordinated operation, not found on any other chute, requires only one small air cylinder to operate
- Direct connect your compressor to the unit OR you can attach a bottle of compressed air to the unit
- Chute will cycle 800-1000 times on one large cylinder of air
- Bottled air allows roper to place chute anywhere regardless of availability of air and electric
- This unit allows user to operate with release lever, on-board push button, or remote from horseback
- Features our durable, corrosion-resistant powder coat finish

THE NEW STANDARD IN ROPING CHUTES

Tarter Roping Chutes are now the new standard in roping. These feature-packed units have innovations never before experienced on the market, with four models to choose from.

As an added bonus, all of the electric chutes have a manual, an electric, and a remote trip to choose from, something not found on other roping chute offerings.

1. All chute models - manual, electric, and air-driven - can be released manually at any time.
2. Electric and air chutes can be operated by manual release, push-button release, and remote release.
3. Unique front/rear gate design opens rear gate as front gate closes.
4. Easy one-handed operation for both tailgate release and opening/closing. Chute can be manually operated from either side of chute.
5. Grease zerks on pivot points.
6. Solar panels keep on-board battery charged with no need for 110V.
7. Gate design allows for easy removal of headgate if desired.
8. Slanted headgate design helps keep steer's head up.
9. Lower front openings give steer greater visibility to encourage keeping their head up.
10. Fully covered and protected electronics feature our sure-release system, which guarantees release of headgate regardless if steer is putting pressure on door.
11. Greater ground clearance than any other roping chute on the market.
12. Unique headgate stop and latch mechanism prevents any gate bounceback whatsoever helping eliminate steer hesitation on release.
13. Ground clearance under chute allows for easy access to cleaning out or building up if trenched out.
14. 4-button remote allows for full chute operation from horseback.
15. Rear gate pivot from top for easier operation, greater ground clearance in rear, and no components in the mud or manure.
16. Dual cylinder operation on chute can be operated by compressor or on bottled air.

YouTube
[youtube.com/tartertv](https://www.youtube.com/tartertv)

Weather protected electronics and battery box.

On-board solar panel for automatic battery charging.

Gliding tailgate with simple one-handed manual release or air-operated release.

On-board and remote operation.

Works easily with direct connected air or with small stand alone air container.

NOTE: Air tank must be supplied by customer.

Single small bore super efficient air cylinder.

REMOTES

- Original replacement remote for your roping chute
- Clips to belt loop for easy access

Description	Item #	Height	Width	Length
Single Button Remote	SBR	1-5/8"	2-3/4"	3"

LEADUP ALLEY

- Used to guide steers to the roping chute
- Heavy drop pin hookups to easily hook to other leadups or chute
- Slanted bottoms prevent animal turnaround
- Optional gravity activated backstop allows animals to advance in the alley while not letting them back up
- Available in 8' and 12' lengths
- Features our durable, corrosion-resistant powder coat finish

Optional Backstop - BO

2" SQUARE CORNER SUPER-DUTY GATE

- Used to provide an entrance for animals or equipment into arena
- Stands 60" tall with saddle welded square corners
- Laser cut brace technique provides a continuous and smooth interior surface for animal safety
- Constructed from 2" 16-gauge tubing
- Super-duty hinge pin on welded swivel-collared hinges
- Weld-on chain latch
- Available in 6'-16' sizes
- Features our durable, corrosion-resistant powder coat finish

ARENA WORKER

- Used to groom arenas to reduce injuries and boost performance
- A must have for any arena whether for competition or personal use
- Adjustable S-tines rip tough soil leaving a smooth uniform look
- Breaks down hard dirt clumps with ease and the floating drag blade leaves a smooth uniform finish
- 2-stage quick-hitch Category I and Category II pin hookups to fit both medium and larger size tractors (2-stage Cat. I & Cat. II pin included)
- Available in 6' and 8' sizes
- 6' model works efficiently for 40-70 HP on 540 RPM tractors
- 8' model works efficiently for 60-90 HP on 540 RPM tractors
- Quick-hitch compatible
- Features our durable, corrosion-resistant powder coat finish

8' Arena Worker	AWGR8*	45"	878 lbs.	99"	84"

*Built to order – Additional lead-time may be required.

BUCKING CHUTES

- Used in arenas for rough stock events
- Constructed of virtually indestructible 8-gauge and 11-gauge materials
- Spring-loaded lever latches and roller guides loaded at the bottom of each chute creating an easy open walkway from chute to chute
- Roller latches allow the gate to open under any condition and provides maximum functionality providing a safer option
- Strategically placed tie-down bars to allow better control of animals once "tied-in"
- Gate door panels constructed of indestructible "Rumber"
- Each gate is quick and exchangeable
- More filler bars giving more spacing for better access for hooking cinches and flank straps
- Attachments for sponsor ad billboards
- Available in left and right hand versions
- All chutes come equipped with a platform
- Stairs and handrails sold separately
- Features our durable, corrosion-resistant powder coat finish

BUCKING CHUTE ACCESSORIES

Tarter Bucking Chutes have been designed to withstand the toughest livestock environments. The accessories that attach to the bucking chutes are no exception. All accessories are recommended when purchasing a bucking chute. These will give you maximum safety while using your chute. The platform comes with each bucking chute purchased while the rails and stairs are sold separately.

The David Key Arena was designed by David Key himself. This arena is a collection of features and ideas that he liked from all of the arenas he has roped in throughout his career. This arena will reduce wasted down time and allows the roper to manage all aspects of the arena from horseback.

David Key

EQUINE Equipment

Stalls featured at the Kentucky Horse Park that housed the world's most elite horses at the 2010 Alltech FEI World Equestrian Games.

World Equestrian Games™
Kentucky 2010 

SFP10

PREMIUM HORSE STALLS

- Heavy-duty “shark” wire, for improved air flow, strength, versatility, and horse safety
- Spring-loaded, single-handle, easy latching door system on smooth ball bearing rollers
- Built-in drop pin connectors made for easy connections
- Can be ordered with sliding sides or fixed sides
- Pre-installed 3/8" textured poly board that is unbreakable and easily washable
- Stalls stand 85" tall
- Strategically placed 3 height hooks in doorway to allow for easy hook up of stall guard
- Outside hooks on top – allow for cross bridling in alleyways between stalls
- Heavy-duty flame retardant poly panel cannot be cracked or broken and provides ease of cleaning and unparalleled durability
- Stalls available with solid or vented sides
- Features our durable, corrosion-resistant powder coat finish

STANDARD HORSE STALL

Our reversible sliding-door horse stall is ideal for open barn/shed applications, and the 7' tall sides and fronts can be ordered separately or as a complete unit. A stall front can be installed in an existing barn or you can convert a barn by using the entire stall. Individual corner bracket allows for one or multiple side-by-side units.

NOTE: Stalls do not include wood or other filler material. Stall brackets and lumber kits sold separately.

This unit features:

- Stall door can be mounted on either side of stall to allow the door to open from right or left hand side
- 2-1/2" bar spacing to ensure horse safety
- Convenient small grain opening
- Low maintenance, easily accessible, slide bar gossip gate allows air-flow through stall and to give easy access to the horse without entering stall
- Horizontal lumber easily installs and creates a stylish look in any barn
- Features our durable, corrosion-resistant powder coat brown finish

CORRAL PEN CALCULATOR

- 1) To find the number of panels needed, multiply the desired diameter (straight line passing through the center of the circle) by 3.14. This will determine the circumference (the distance around the circle).
- 2) Divide the circumference by the length of panels being used. This will equal the number of panels needed.

Diameter of Holding Area (Feet)

Panel Length	20'	25'	30'	35'	40'	45'	50'	55'	60'	65'	70'	75'	80'	85'	90'	95'	100'
10'	6	8	9	11	13	14	16	17	19	20	22	24	25	27	28	30	31
12'	5	7	8	9	10	12	13	14	15	16	18	20	21	22	24	25	26
16'	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20

NOTE: Sizes of pens are approximate. Pen sizes will vary depending on the size of the Walk-Thru Arch Gate used. Walk-Thru Arch Gates are available in 6' lengths only for horse corral panels. We also have available a 6' panel welded to a 6' arched gate which makes for a more rigid entry into the corral or for building 12' x 12' square corrals with individual openings.

HORSE CORRAL PANELS

- Ideal for light confinement and portable for travel to overnight shows or trail rides
- Available in 5' tall configurations
- Features our revolutionary laser cut brace technique providing a continuous smooth interior surface
- Straight end posts with quick-pin latch for easy hookup
- Easily hooks to Walk-Thru Arch Gate
- 5' tall panels available in 10', 12', and 16' lengths in our durable, corrosion-resistant powder coat brown finish

Description	Item #	Approx. Weight
5' Tall x 10' Long Corral Panel	HCPBR510*	48 lbs.
5' Tall x 12' Long Corral Panel	HCPBR512	56 lbs.
